WORK EXPERIENCE

Franklin County Auditor, Columbus, OH
Application Developer (March 2022 - Current)
- Maintain existing legacy C# and .NET projects and deploy incremental improvements or bug fixes
- Generate reports or dashboards against SQL databases using SSRS or PowerBI and Power Automate
- Frequently translate business requirements into technical action items for reporting or development purposes
- Lead application support and troubleshooting for completed applications as necessary
- Research a wide variety of modern development practices, CI/CD pipelines, JavaScript libraries, frameworks, and tooling to help plan a large scale website modernization - from C# and Razor to JavaScript and React
- Track issue and project status using GitHub to manage time and project priorities

TD Synnex, Obetz, OH
Electronics Repair Technician I (October 2021 - March 2022)
- Analyzed and used troubleshooting skills to resolve technical problems on equipment and components
- Resolved integration and configuration problems according to provided specifications
- Managed the repair of multiple systems concurrently
- Logged detailed information regarding repairs via a database
- Performed basic through-hole soldering when necessary for board-level repairs

Microcenter, Columbus, OH
Product Repair/Test Technician (October 2020 - May 2021)
Parts Coordinator (May 2021 - September 2021)
- Responsible for locating and ordering parts requested by team members for repairs
- Assisted colleagues with troubleshooting procedures to determine the point of failure on a device
- Communicated with vendors regarding part orders, returns, and in-warranty repairs
- Certified through Dell, HP, and Lenovo to order parts and service units
- Ensured the budget was never exceeded for individual units requiring multiple repairs

Columbus City Schools, Columbus, OH
Web Development Intern (May 2020 - August 2020)
- Used software to plan visual layout and backend structure of website and databases
- Regularly communicated with leadership to ensure goals were being met
- Used a combination of HTML, CSS, PHP, Javascript, and SQL as needed to fulfill project objectives. Features included a CRUD system to manage the MySQL database, an Ajax-powered live search, and converting completed HTML forms to printable PDFs through the use of PHP
